Number 22

Here and There

SOVIET DIPLOMACY

One of the serious problems for the western powers is how to get along with Russia. You either have the opinion that it cannot be done or you find it a mystery — the solving of which is like putting a complicated puzzle together. The first thing to know is that Russian delegates never speak their own minds. When they present an opinion, it is one that has been "handed" down from Uncle Jos Stalin. No Russian dare compromise. He has to carry out the "terms" which were given him. This is a part of the system — there can be no question of opinion from higher up. For this reason, Molotov and other Russians appear inordinately stubborn on most points. Really they must follow the pattern set out for them. They have always, without question, accepted orders from the Head; to expect anything different when they attend a peace conference is too much. Dictatorship is like that, everybody but the Head takes orders. No matter what course they may take, it will always be documented. This is an easier matter with the Russians than the Western powers because they go to the conference table with their policy set, and without ever considering the necessity of compromise. This gives the impression that the Russians think their plans are always right, at least they always speak and act as if they thought so. If, suddenly, the Kremlin alters or reverses its policy, the Russian will argue against a policy which he supported wholeheartedly the day before. It never occurs to him that such an about face makes his fellows gasp, or greatly annoys them.

The Russians understand the Oriental viewpoint when bargaining. He begins by asking way more than he ever expects to get. Stubbornly he reduces his price, as if granting a special favor. This time this takes irks a westerner, but is rather enjoyed by the Russian.

The Russian delegates remarks at the Paris Peace Conference may have been uttered as part of their bargaining process. Molotov never worries about his voters at home, Bevins and Byrnes must please electors or face party defeat at the polls. This may account for the difference in their speeches.

The public is still not convinced of Russian sincerity, nor do we understand the Russian mind well enough to see beyond the smoke screen which he throws up.

Keist Harvester Co. Presents Movie

Friday evening Sept. 27 in the Hengarian Hall, the Keist Harvester Company of Pocatello Idaho gave a motion picture portraying Keist Beet Harvesting Machinery in operation. Mr. Oppel of Oppel Motors of

Lethbridge was on hand to explain operation and construction and answer questions.

The movie was very well attended there being about 100 farmers present. The movie showed the Bell Topper and Victory Beet Loader in operation. The audience was very enthusiastic and many favorable comments were heard.

STIRLING NEWS NOTES

By Mrs. Lief Erickson

Beet harvest is going strong in this section, our receiving station opened on Wednesday, 28th, with Bill Eaves, Farrell Oler and Henry Parrott in charge.

Cal Brandley left by plane Sunday for Provo, Utah, where he will attend B.Y.U.

Kleth Nelson returned home on Tuesday from the hospital, where he had his tonsils removed.

Mr. and Mrs. E.N. Peterson have returned home from Edmonton where they spent the greater part of last week getting their son, Gordon, settled for the school term. He is registered as a student of Law at the University.

Mr. Al Candy, of New Dayton, has accepted a position on our High School staff. He has spent several years in the service. Previous to this, he was principal of a boy's seminary in Manitoba. He will make a welcome addition to our teaching staff.

Mr. Carl Young has entered the University of Alberta where he expects to obtain his degree in education.

Extensive plans are being made for the opening Relief Society Party to be held on Tuesday. This party will take the form of a testimonial to the retiring officers.

Douglas Christensen was rushed to the hospital on Monday morning and was operated on for appendicitis. His friends will be glad to know that his condition is favorable.

A dance was held on Friday in the Hall sponsored by the Hoeky Club. Those attending had a very enjoyable time. The music was supplied by the Hi-Hatters.

Mrs. Boyd Hirshe entertained on Wednesday afternoon, the occasion being her small daughter Sharon's birthday. A number of the "mamas" and their young hopefuls attended. A lovely lunch including a pretty birthday cake was served.

"Bill" Erickson left for Edmonton on Monday where he will enter University as a student of Dentistry. Mrs. Erickson and daughter will follow as soon as housing accommodation is available.

Welling News

by Mrs. E. K. Bullock

Dick Chipman left Sunday for Calgary to start his studies at Tech.

The barn dance held at Alvin Bullocks was successful but it became too cold before the evening was over. The crowd went to the church to spend the rest of the evening and to serve the lunch. The majority of the married folk were present.

Mr. H. Chittenden of Idaho Falls, is visiting his sister Louisa Wilde and other relatives.

Miss Hazel Bullock daughter of Mr. and Mrs. Al Bullock graduated as a nurse from Galt Hospital on Wed. Miss Bullock's sister, Peggy

will graduate next year.

Mrs. LaTee Lowe, daughter of Mr. and Mrs. S.F. Wilde, is home to visit for a few weeks.

The Relief Society opening social was held Tuesday at the home of Mrs. Alda Bullock. 19 ladies were present. A pleasant time was had in discussing the courses for the coming year and in visiting. A delicious lunch was served. The regular meetings will start next Tuesday.

Marilyn Wolsey, daughter of J.R. Wolsey, was in Galt Hospital for a couple of days as the result of a tonsil operation.

Mr. and Mrs. Wilford Brandley, also A.D. Erickson motored to Lethbridge on Sunday to participate in a Sacred Cantata staged there by C.F. Tollestrup.

Willis Fawns has accepted a position as assistant chemist at the Picture Butte sugar factory. Mrs. Fawns will be employed at the Logan Knit Co in Lethbridge during his absence.

Mrs. Albert Brandley has as her guest, her sister, Miss Stella Wilcox.

Phil Proctor and Roy Spackman are resuming their studies at the U. of A., Roy in medicine and Phil in Civil Engineering.

(continued on the back page)

Thomas Hicken Passes at 94

Death came to one of Raymond's oldest pioneers Monday, at the Municipal Hospital.

Mr. Hicken, 94 years of age, was removed to hospital last Friday after being ill at his home for a week. Up until that time he had been in fairly good health, able to do his light chores and attending church regularly.

Born December 19th, 1852 at Provo Utah, he moved to Heber City, Utah when a young boy and grew to manhood there. For several years he taught school there and he was the Assessor and Collector for Wutsach County for ten years. He filled a mission for the L.D.S. Church in the Southern States. Before moving to Canada in 1902 he was Bishop of Heber Ward.

He married his first wife, Sara Jane McMullin and to them seven children were born. One died shortly after birth with the mother.

His second wife, Mary Lavina Hicken raised the other six children and ten of her own. All of these children are living and were in attendance at the funeral except two. Mrs. Nell O'Brien and Ben Hicken. Left to mourn are his widow, Mary Lavina Hicken and children Albert, of New Dayton, Mrs. A.P. Scoville, (Elizabeth) Raymond, Warren of Heber City Utah, Mrs. Helen Duke, Vernal Utah, Mrs. Mary Moulton of Heber City, Rufus, Spanish Fork of the first family, and Rulon, Mrs. F. Low (Rowena), Mae of Salt Lake Mrs. Leah MacKenzie, Medicine Hat, Mrs. Nelson (Ora), Mrs. Howard Mendenhall (Lauretta) of Richfield Utah, Mrs. Ried Kirkham (Eama) Ogden Utah, Ben of Hollywood Cal., and Mrs. John O'Brien (Nell) of Los Angeles Cal. Also 62 grandchildren and 25 great grandchildren.

NEWS NOTES

A lovely shower was held Monday in the First Ward Recreation Hall for Mrs. Winnie Layne, wife of Hugh Layne who recently arrived from Kent England, when about 75 ladies gathered to welcome the little English bride. A lovely program included a piano solo by Mrs. Leah Jones; a reading by Margaret Larsen and piano duet by Lela Wing and Shirley Allen.

Mrs. Layne was assisted in unwrapping the many lovely gifts by her sisters-in-law Lucille and Adrienne Layne, and she graciously thanked everyone for them.

Mrs. Magdalen Hall Passes Away

The death occurred Tuesday, October 1, in the Municipal Hospital of Mrs. Magdalen Hall, age 75 years, wife of J.D. Hall, esteemed and old time resident of Raymond.

Mrs. Hall had been in poor health for some time.

Born in Troy, Wisconsin in 1871, she came to Canada in July 1909. She leaves to mourn, her husband J. D. Hall, sons Frank of Raymond, Irving of Portland Oregon, Dudley of Seattle, Washington, and Mrs. Mabel Veen of Raymond, and one sister living in the states.

Local Happenings

Reported by Elsie Mitchell

Mr. and Mrs. John Roberts have moved into the residence of Mrs. Violet Earl until their new home is completed. Mrs. Earl has taken up residence in Lethbridge.

Miss Janet Heninger left Sunday for Logan Utah where she will attend College.

Mrs. June Albrecht is receiving a visit from her sister-in-law Mrs. Mabel Johnson of Barnwell.

Mr. and Mrs. O.H. Snow left Tuesday to spend the winter months in Utah.

Mr. and Mrs. W.A. Molstead are in Raymond for a few weeks. Mr. Molstead is relieving Mr. Ball at the CPR station while Mr. and Mrs. Ball are away on holidays.

Hyrum Fromm is home from Montana for a few days visiting his family here.

Mrs. Winston Shaw and small daughter Pam spent the week end in Rosemary, guests of her sister Mrs. Jack Nilsson. Friends will be pleased to learn that Jack and Byron Vance are both improving from their recent accident. Mr. Nilsson is still in hospital.

Born to Mr. and Mrs. Leonard Kesler, Sunday September 29th, a daughter.

Congratulations are being received by Mr. and Mrs. William Mehew, nee Melba King on the birth of a son born Sunday September 29th, at the Municipal Hospital.

Mr. and Mrs. Otto Mehew and daughter of Lethbridge were Sunday visitors in Raymond with Mr. Mehew father who is still apatient in the local hospital.

Josephine Litchfield who is teaching school in Magrath, spent last week end at home.

Mr. and Mrs. Harry Allan of Calgary spent the week end here, guests of Mrs. Allan's mother, Mrs. R. A. Nalder.

Mr. and Mrs. Clarence Robinson of Etzikom have been visiting this past week at the home of Mr. Robinson's Uncle, Mr. Harry Robinson.

Mr. and Mrs. Era Nilsson spent last week in Vancouver.

Mrs. Sara Sabey has been visiting her son Evan and family for some time, also her granddaughter Mrs. Laurie Duncombe.

Born to Mr. and Mrs. Rex Campbell, nee Fern Piegrass, of Salt Lake, a daughter.

Born to Mr. and Mrs. Verl Meldrum, nee Rowena McMullin, a baby, Oct. 1st, at Brooks Alberta.

Mr. and Mrs. Allan Coleman of Magrath were guests of Mr. and Mrs. Jim Bridge this week. Mr. and Mrs. Gordon Matkin of Magrath were Raymond visitors Monday evening visiting Mr. and Mrs. Hugh Layne.

Miss Margaret Grep met with a painful accident Monday while working in the kitchen at the Sugar Factory when she was badly scalded. She expects to be able to return to work the end of the week.

Water to Cemetery

Townpeople of Raymond will be very interested to learn that the pump and pipes for the new water line to the cemetery has arrived and work on this project will start at once. This will take the water to the cemetery and will not require the entire grounds. This is a much needed improvement and more money will be needed, and it is hoped that when contacted, all clubs and individuals will respond.

It is the object of the cemetery board in time, to have a park lawn as Mother's ties, with no capped graves, tall tombstones or fences.

Born to Mr. and Mrs. John Howard Monday September 30th, a baby girl.

Born to Mr. and Mrs. Leau Nelson a baby boy, Saturday, September 28, at the Municipal Hospital.

Friends will be pleased to hear of the arrival of a son, Monday Sept. 30, at the home of Mr. and Mrs. Gibb of Cardston. Mrs. Gibb is the former Hazel Redd of Raymond.

Snapshots and Scraps

Last week, King George II of Greece returned to his native land as King after having been in exile. The light blue and white striped flag with the white cross flew from the tops of buildings and in the streets as well as from many open windows.

The white on the Greek flag stands for Peace and Purity, the blue for Truth and Loyalty. The nine white and blue stripes represent the nine syllables in the Greek phrase, "Eleutheria a thantos" meaning "Liberty or Death." The cross is on the flag because of the part the Church played in the winning of the independence of the Greek people from the Ottoman Empire in 1821. At that time, the Greeks were in battle with the Turkish forces near a monastery. The monks joined the fighting, and, as they did not have a banner or flag, one monk took his white pleated skirt while another monk removed his blue underrobe. Together, the white and blue colors were raised. The incident was the inspiration for the Greek flag of today.

Robert J.A. Stead was born in Middeville, Ontario, in 1880. Young Robert came west with his parents when but two years of age. When old enough he went to school in a one room country school, but as far as education in a school room goes, Mr. Stead has had very little.

He was first known as a poet when he had his war poem, "Kitchener," published which was soon followed by other poems as well as novels, but it is for his novel, "The Cow Puncher," that he is best known. "The Cow Puncher," is the story of a western cowboy who went to France to fight for his native land, and did not return. To his son, who had never seen his father, fell the task of building a home in the west for himself and his mother.

Robert Stead has been on the staff of the Calgary Morning Albertan; since 1918 he has been the Director of Publicity for the Department of Immigration and Colonization of Canada for the Dominion Government. His last book is in the nature of a report, "Canada's Playgrounds," which was published in 1941.

King Tommy George by A. Buckingham

New Variety Of Oats Beats All Types Of Rust

OTTAWA. — Canada's agricultural scientists have come through with another victory over nature.

This time it's a new man-made variety of oats, so new that it hasn't yet been given a name. Its peculiar feature is that it is able to resist all the strains of stem and crown rust that appear in Canada and which in some sections forced farmers to abandon oat production and turn to other cereals.

The strain also will resist loose and covered smut which has made its appearance in some oat-growing areas.

The product of 14 years of checking and cross-breeding, the new variety has been developed by plant breeders and pathologists at the Dominion rust research laboratory at Winnipeg.

Officials said it was hoped that by next spring some 1,500 bushels of the new seed may be available for distribution to selected seed growers to increase production of seed to the point where there will be enough for all who want it.

This is not the first oats variety that is resistant to rust, a disease in which rust-colored spots develop on the stem, leaf or crown of the grain and retard its maturity. But it is the first strain that is resistant to all the various types of rust.

Work on the new variety was started in 1932 when some seed of a South American variety of oats known as Victoria was obtained from the United States department of agriculture and was crossed with a sister strain of Vanguard, a variety resistant to certain stem rust and now widely grown across Canada.

URGES A CHANGE

Anthony Eden Thinks New Approach To Russia Is Necessary

LONDON.—Anthony Eden, wartime foreign minister in Winston Churchill's coalition government, in a speech urged adoption of a "new approach" to Russia by Britain and the United States because the present relationships contain an "imminent threat of war."

Mr. Eden told an audience at suburban Watford that only "a new spirit and a new approach" can "avoid fatal consequences."

He echoed Mr. Churchill's call for a "United States of Europe" and said "there is no reason why the two ideologies" of communism and capitalism "should not live together in peace if both will... not back their fancies in every other hand."

"Restraint may be difficult to practice, but surely this is not too much to ask as the price for enduring peace."

In his discussion of relations with Russia, Mr. Eden declined to outline a method for a "new approach", suggesting instead that "it is for the governments to judge how such a new approach could be undertaken." He said "too often suspicions, however groundless at the start, harden into facts."

"A positive effort to dissipate these suspicions is required from the great powers. They cannot be content with the day-to-day wrangles of the Paris peace conference and the security council."

GETTING MORE FOOD

BERLIN.—Deputy military governors for the United States and British occupation zones announced jointly that the daily food ration for normal consumers in the two zones would be increased to 1,500 calories, effective Oct. 14. It will mean an increase of 400 calories daily in the British zone and 250 to 300 in the American zone.

FORESEES OIL ACTIVITY IN NORTH

Hon. W. A. Fallow, Alberta's minister of public works, has a vision of a huge new oil industry at Bitumont, 50 miles down river from Ft. McMurray. He says that if a report his department is preparing on the famed tar sands shows oil can be separated profitably, a separating plant in the north and a pipe line to Edmonton will be built by private interests.

Alberta Wheat Crop Largest In Four Years

EDMONTON. — Alberta's wheat crop this year is estimated at 142,000,000 bushels, which is the largest yield since 1942, according to figures issued by the provincial department of agriculture.

"In spite of smaller acreages of oats and barley in Alberta this year, the amount of grain harvested will be considerably larger than in 1945," says the report.

The first estimate of the Dominion bureau of statistics indicates a total of 110,000,000 bushels of oats and 52,000,000 bushels of barley this year, compared with 76,000,000 bushels of oats and 37,000,000 bushels of barley in 1945. Acreages of oats and barley were reduced this year by 11 per cent. and seven per cent. respectively.

The production of spring rye has more than doubled compared with last year and flax seed shows an increase in production in spite of fewer acres seeded.

R. M. Putnam, assistant deputy minister of agriculture said there would be no particular wheat damage from frost as practically all this grain has been cut.

He said there were some local shortages of farm labor, particularly in Stettler district but generally the situation is satisfactory. There are about 1,400 eastern farm laborers working in Alberta harvest fields.

HIGHER PRICE

Saskatchewan Timber Board Has Announced New Ceiling On Pulpwood

PRINCE ALBERT.—A new ceiling of \$9.50 per cord for rough pulpwood has been announced by the Saskatchewan timber board. The price previously was \$8. The announcement said the new price had been negotiated with the federal timber controller.

The price of peeled pulpwood is advanced from \$11 to \$13. The timber board estimated the amount of pulpwood which will be marketed in the province next season at between 30,000 to 40,000 cords.

MAY USE PALACE

COPENHAGEN. — A palace built nearly 200 years ago for the Danish statesman Count Bernstorff will become European headquarters of the United Nations Food and Agriculture organization if an invitation from the Danish government is accepted.

MORE SAFEGUARDS

Countries Seek To Better Safety Standards For Long Distance Flights

WASHINGTON.—The trans-Atlantic airliner crash near Gander, Nfld., has focused new attention on efforts being made by most aviation-minded countries to raise safety standards for long distance flights.

Among factors under study, most and possibly all involved in the Newfoundland crash, are these:

1. Standardization of radio and other aids to navigation.
2. Reduction of fire hazards in flight and after rough landings.
3. Greater protection for passengers in event of crashes.
4. Ways of establishing adequate facilities for finding and rescuing accident victims.

Information available in advance of reports by official investigators indicates the pilot, because of unsatisfactory weather conditions at Gander, apparently decided to go on to one of the alternate fields on route.

It is possible confusion then arose as to what radio beam was being followed. This is reported to have occurred recently on another plane which, however, was given a radio warning in time to correct the error.

It is possible also that there was a misinterpretation of altitude figures, since most European countries use the metric rather than the English system of measurement.

STOP SHIPMENTS

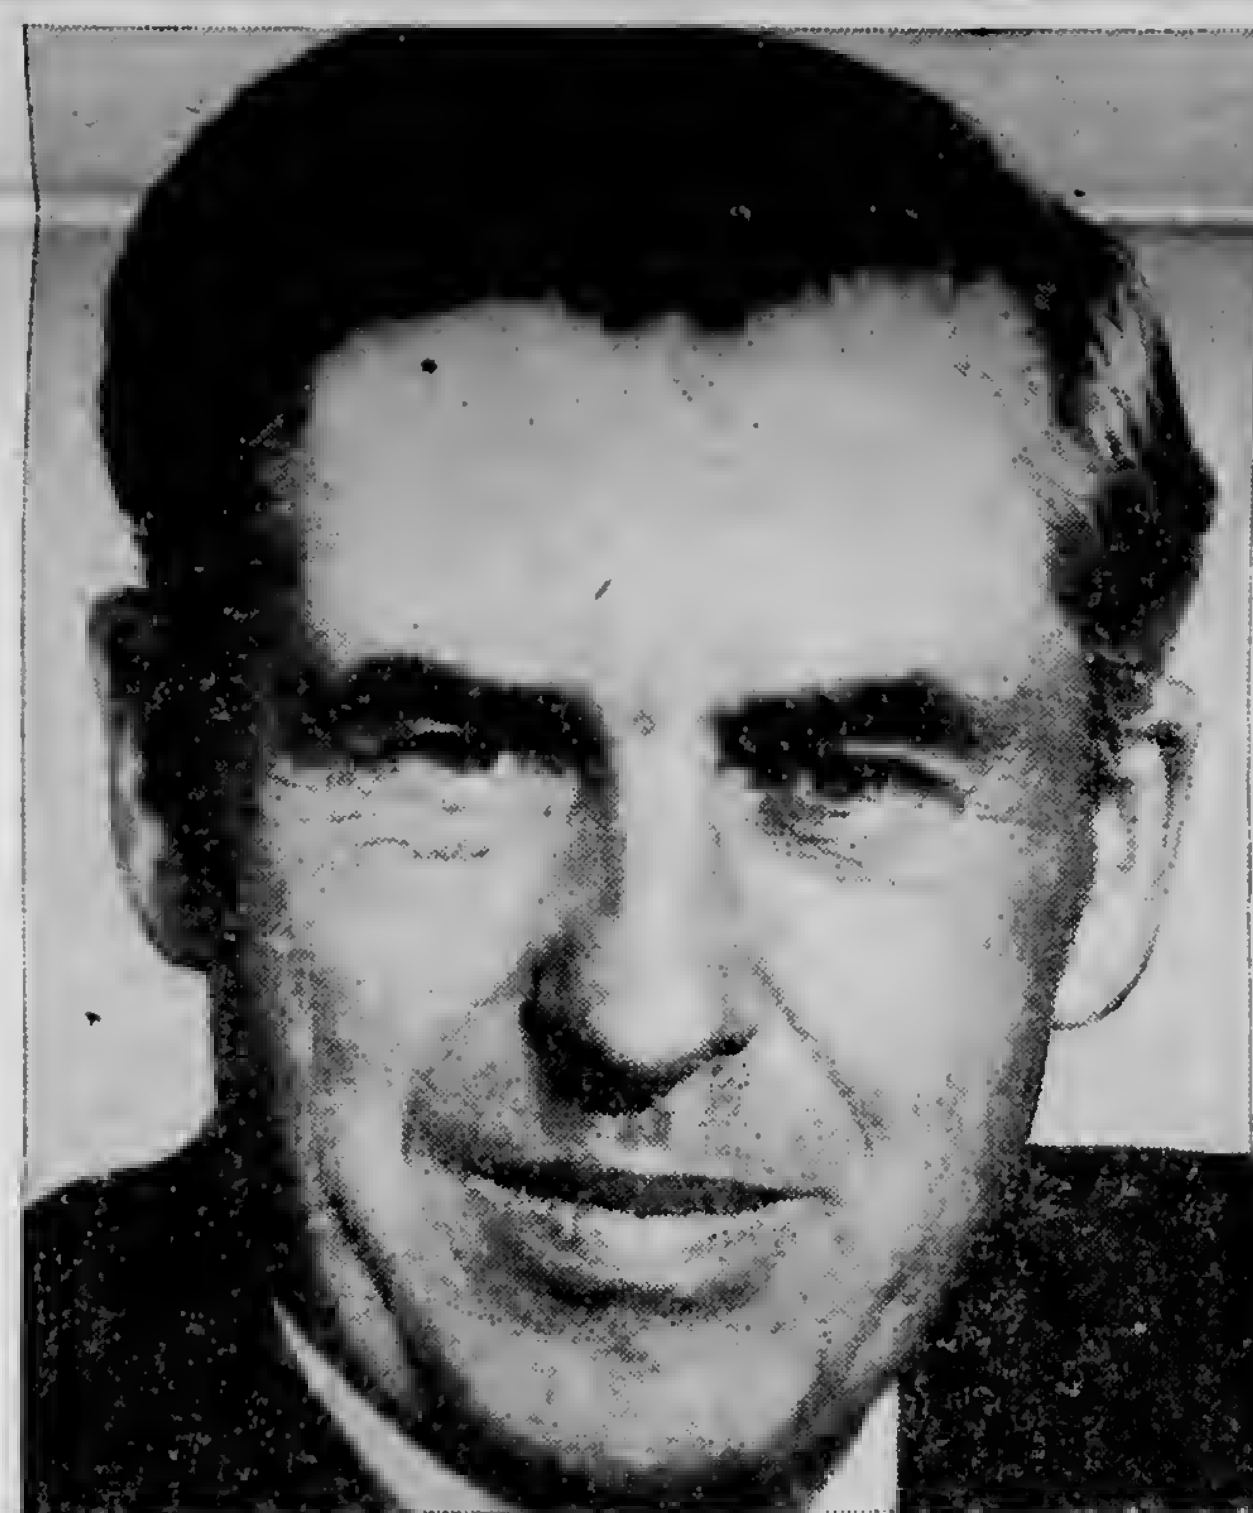

Canadian Wheat Board Issues New Ruling Governing Barley

WINNIPEG.—The Canadian wheat board announced that effective immediately no shipments of barley may be made to Fort William-Port Arthur from any shipping point west of these ports. Shipment of damp barley is exempt.

It was also announced that shipment of oats from each western elevator to any destination would be permitted in the ratio of one car of oats after every three cars of wheat had been shipped.

DANGEROUS TROPHY

MODESTO, Calif.—Dorothy Bowerman, 14, looked about for something to hammer with when an arm became loose on a chair. She chose a one-pound army shell, kept for more than two years as a war trophy. The shell exploded, blowing off one of her hands. Part of the charge entered her body. She died in hospital.

FORMER U.S. VICE-PRESIDENT, HENRY WALLACE flung a bomb-shell in the diplomatic world when he made public his letter to President Truman urging guarantees to Russia.

MAY END SOON

Conclusion Of Bread Rationing In Britain Is Seen

LONDON.—First shipments of 1946 Canadian wheat are expected in the United Kingdom and there is rising speculation that bread rationing, imposed in July, will be ended in a few weeks.

Bakers are considering a voluntary flour rationing scheme at the invitation of the food ministry.

Spokesmen said they could say nothing of when rationing would end but recalled that Food Minister John Strachey said it would end at the soonest possible moment.

Rationing was imposed to meet the temporary shortage situation pending the wheat harvest.

The fuss about rationing has subsided after angry disputes over the adequacy of nine ounces daily as the basic ration, the difficulty of collecting ration points, and protests from bakers that the scheme was unworkable.

Most housewives find the ration sufficient and have been able to turn in some bread ration points in exchange for points on other foods.

Critics of Mr. Strachey still say the costly rationing scheme was unnecessary as the gap between visible supply and early harvests was small. The minister is expected to reply that the recent disaster to Britain's wheat crop on which he depended until Canadian wheat became available in bulk, associated with United States labor difficulties which hampered food shipments, proved how essential it was to have control over wheat and flour use and to see that available supplies were fairly distributed.

USING NEW IDEA

South African Park Officials Will Not Tolerate Trespassing

JOHANNESBURG. — Trespassing motorists who choose to ignore the signs telling them to stay out of the Dongola botanical reserve in northern Transvaal are likely to regret their decision.

The intruders, most of them would-be game poachers, have an excellent chance of winding up in the middle of the park with a set of flat tires.

Roads in the park are skillfully "mined" with bent nails and other sharp-pointed obstacles, laid flush with the road and almost completely invisible to motorists, who may continue for several miles into the park before the "mines" take effect.

ELECTION WAS SURPRISE

Election of Real Caouette, 29-year-old garage manager, running on the Quebec version of the Social Credit ticket in the Pontiac by-election, is looked on by both old-line parties as a major political upset. Liberal loss of the seat drops government support in the House to 123 out of 245 members.

British Exhibit Opened By The King And Queen

LONDON.—The king and queen formally opened the "Britain can make it" exhibition at the Victoria and Albert museum.

In his opening speech His Majesty called for invigorating British industry and trade and for making British design "a hall-mark of pre-eminence in the eyes of the world as Britain's prosperity, solvency, and standard of life depended in the years to come on overseas markets."

He continued: "As we look round us in this hall we can take pride in the speed of our change-over from the grim tasks of war to the creation of these many serviceable and attractive articles of peace. No country was more completely given over to war than ours. Yet we are, I believe, the first fighting country to create a peace-time exhibition of this kind and scope."

The king then toured the 6,000 exhibits of post-war design contributed by more than 1,300 firms and ranging from toys to the latest in house furnishings.

The exhibition took more than a year to prepare and of the goods shown 36 per cent. are reported by their makers as available now for the home market though not in quantities adequate to meet the demand.

More than 40 per cent. of the goods on show are available for export and by the end of the year manufacturers will be able to take export orders for 62 per cent. of the exhibits.

RUSSIA LEADING

Is Ahead In Race With Canada For Tantalum Production

TORONTO.—Dr. Daniel Gardner, rare metals scientist of New York, said Russia is leading Canada in a vital race for production of tantalum, immensely valuable in fields of jet-propulsion and surgery, but predicted in a few years Canada would lead the world in its production.

Dr. Gardner said Canada and Russia are the only two nations capable of producing large amounts of the metal, which will soon be produced at a \$600,000 plant of the Mining and Refining Corporation of America at Edmonton.

NO MORE PRIVILEGES

OTTAWA.—Defence headquarters announced that wartime railway fare privileges for servicemen end Sept. 30. The concessions, granted early in the war, meant a considerable saving to the troops who could travel any distance for a nominal cost of no more than \$15.

U.S. And Britain Are Staying On Job In Europe

LAKE SUCCESS, N.Y. — United Kingdom and United States delegates to the United Nations economic and social council told Russian delegates that both their countries were in the European rehabilitation picture to stay.

They reminded Russian critics of what had been done by the two major powers to save and to rehabilitate Europe and warned that they were not going to let all that effort go to waste and permit European countries to sink into a morass of inflation and economic chaos.

The spokesmen were Philip Noel-Baker, British delegate and minister of state, and John Winant, permanent United States member of the council.

They were answering bitter criticism from three Soviet delegates of the 450-page draft constitution of an economic commission to co-ordinate rehabilitation efforts in the war devastated areas of Europe.

Nikolai Feonov, Russian delegate, said the report had overlooked the realities of the European problem and should be redrafted. He said it dealt with economic practices and advice but did not promise "immediate relief and immediate help."

But the Soviet delegate was particularly bitter over the apparent treating of Europe as an economic unit. "I do not believe Europe is an economic unit and if it is, why is the United States brought into it?"

Mr. Feonov implied that the United States was on the proposed commission to take care of its own economic welfare, and brought a sharp retort from Mr. Winant.

"I want to remind the Soviet delegate that the United States is part of the occupying force in Germany and Austria and is on the Allied control council," he said. "What is done by that council is important to the economy of Europe."

Mr. Noel-Baker said the economic commission would in a measure replace UNRRA which goes out of existence next year and which had spent nearly \$4,000,000,000 to aid war victims of Europe. Two thirds of that money came from the United States and Britain was second largest contributor.

NEEDS MORE WHEAT

Fall Rains Have Destroyed Large Quantity In Ireland

DUBLIN.—The heavy rain which has fallen in Ireland has destroyed large quantities of wheat from Canada and the United States this year, compared to her normal imports of 150,000 tons, informed sources said.

A serious wheat situation has arisen from abnormal fall rains which may have destroyed one quarter of the country's grain crop.

Sean Lemass, minister of industry and commerce, has organized a bread-rationing plan and 3,000,000 rationing books are ready for printing at short notice, it was learned. Bread rationing would mean a reduction in Eire's food export to Britain because diet alternatives would have to be supplied.

PLENTY OF COLOR

NEW YORK. — The Hudson and Manhattan railroad like June, is "bustin' out all over" in color. The first four cars to be finished in a repainting program were scheduled to go into service with pink floors, white ceilings and two-tone aqua-marine walls.

SMUGGLERS CAUGHT

HEERFORD, Germany.—An international smuggling gang operating on a large scale over Dutch, Belgian, Danish and German frontiers has been smashed by the combined frontier control services and a number of arrests made. 2692

PALESTINE VISITOR REPORTS TO ONTARIO ZIONISTS—Recently returned from Palestine, Mendel Fisher, left, executive of the Jewish National Fund of America, chats with Max Graftstein, editor of the Jewish Observer, in London, Ont., where Ontario Zionists heard him discuss Holy Land problems.

TWENTY-ONE LIVES LOST IN LANDING CRASH—A Dakota transport plane such as this took 21 R.C.A.F. men to their deaths when it crashed recently during an attempted landing at Estevan, Sask., and burst into flames.

CANADA'S INTEREST IN WORLD INDUSTRY

Our prairie wheat growers depend for their living mainly on the sale of 70 percent of the wheat they haul to country elevators to some sixty different countries of the world. The ability of the people in these foreign countries to purchase our wheat, which they would dearly like to have, depends on the amount of their own ability to produce things, mainly manufactured goods, which they can sell abroad so as to obtain sufficient Canadian dollars with which to buy our wheat.

We observe with some fear, therefore, the tendency going on in the world to reduce Germany, Japan and some other countries to purely agricultural states, to deprive them of their machinery and industries. It is just as certain as the sun rises and sets that as the industrial production of these countries is reduced, so will be reduced in strict proportion their ability to purchase Canadian wheat. Our prairie farmers, therefore, are actually most vitally interested in the rehabilitation, not only of agriculture, but also of industry in the world, even in our former enemy countries.

(Searle Grain Company Ltd.)

Alberta Parks Show Gain in Registration

Alberta parks showed a gain of more than 300,000 visitors during the period ended August 31 over the previous year, according to information received by the Alberta Motor Association.

While some of the parks did not exceed the visitor total for 1941, which was the last pre-war year, they forged well ahead of 1945.

Banff showed heavy gains, as did Jasper, Waterton Lakes and Elk Island over last year. In fact, Elk Island and Waterton Lakes were ahead of the 1941 figures.

Park officials have pointed out that a big year is expected in 1947 when a flood of visitors may be expected in Alberta. Consequently plans are being made to improve park roads to meet this demand.

Federal officials have announced that a registration booth will be established at the south entrance to Jasper Park on the Jasper-Lake Louise highway, so that there will be an accurate total of Jasper Park visitors next season. Jasper has claimed that it has not been getting full credit for its visitor total.

PLAN TOURIST HOTELS ON ALASKA HIGHWAY

Tourist hotel and camps are expected to be provided on the Alaska highway next spring, according to officials of the Alberta Motor Association who are keeping in touch with planning activities for 1947.

At last reports, good progress was being made with the construction of refueling stations and lunchrooms. These are about 100 miles apart.

It is expected that the wartime order making the highway and adjacent land within one mile of the road

a military area will be rescinded shortly. Once this restriction is lifted, the way will be clear for purely civilian companies obtaining federal permits to construct tourist establishments of a permanent type.

Meantime, certain traffic is travelling over the highway under permits issued from the traffic control board head office in Edmonton. Most of the through traffic is made up of Americans going to Alaska to settle permanently or on business. The highway has not been opened to general tourist traffic.

NEWS NOTES

Mrs. Dora Dulin and Mrs. Edna Haslam of Washington, nieces of George and the late Jim Heggie were visitors with relatives in Raymond for a week.

Wednesday afternoon at the lovely farm home of Mrs. Melba Holmes, the Ladies Literary Club met for their monthly meeting. Mrs. Joyce Barker was assistant hostess. Mrs. A.C. King gave a very interesting review of the book, "Talking Thru Your Hat," by Lily Dache. The hostesses served a dainty lunch at the close of the meeting.

Miss Elizabeth Romeril who is in training for a nurse at Calgary spent the week end with her parents. Mr. and Mrs. Fred Romeril, Miss Louise Romeril is taking a business course in Calgary.

Students from Raymond attending the B.Y.C. include Elizabeth Brandley, Myra Dahl, Bernice Heminger, Margaret Wing, Kathleen Taylor, Reid Dahl, Robert Holmes, Glen Walker and Carmen Ursenback, formerly of Lethbridge.

Sugar Bureau Confuses Public

Increase ration because stocks better and it might help canning—Stocks 48 million short and official says boost not for canning

Confusion has arisen from announcements made by various officials in the government sugar bureau. First it was revealed that Canada's sugar stocks were five million pounds short of last year despite the Prices Board proclamation that the increase in household ration came as a result of "improvement in stocks". Then the latest Dominion Bureau of Statistics report, September 6, shows the stock position has deteriorated at an alarming rate in four weeks. Present stocks are about 48 million pounds short of the same date in 1945.

John Blackmore, M.P., brought this situation to light in the House of Commons but no explanation has been advanced by officials concerned.

Notice of the ration increase read that "housewives might possibly increase their home canning, knowing that they could replace the extra sugar used, in the coupons becoming valid in September". Complaints of housewives were reported in the press, the basis of most being the fact that housewives had very little sugar on hand for use now—sugar the board claimed could be replaced later—and they considered the boost "too little and too late".

Later, a press statement by a W.P.T.B. official contradicted the original explanation, claiming the ration increase was "not for canning". Miss Laura Pepper, head of the consumer section of the federal agriculture department said that the increase came just in time to help home canning.

Junior Red Cross Week Across Canada

An "all-time high" enrolment of 900,000 members to undertake a five point programme of service is the ambitious objective of the Canadian Red Cross Enrolment Week now underway across Canada, according to information from Miss Jean E. Brown, National Director of the Junior Red Cross. In making this National appeal, Miss Brown stated: "This is Junior Red Cross Week in Canada, the week when we hope that every school in Canada which has not already enrolled in Junior Red Cross for the school year 1946-47, will do so at once."

"At the beginning of the school year all members of the Junior Red Cross must be enrolled in their school branches to be considered active members of the organization. By this means we eliminate all dead wood. When a group of school girls and boys sends a complete enrolment form to the provincial Junior Red Cross office they mean business. 'The Canadian Junior Red Cross is an important part of the world membership of 30 million Juniors, the largest organization of youth in the history of the world'."

Junior Red Cross Officials are hopeful of bettering the enrolment figure of \$27,000 Juniors as at the end of the past school year in order to successfully undertake their five point programme of service during the present school year—1. the promotion of health, 2. relief for child victims of the war, 3. entertainment of veterans in hospital, 4. crippled children's work in Canada, and 5. international exchange of correspondence.

The starting point of the Junior Red Cross programme is the observance of the rules on the health rule cards received upon enrolment or re-enrolment. Health work, however, does not stop at this point. Within the few weeks, Junior members have answered an appeal from Dr. W. R. Franks of the Banting Institute, to supply him with large numbers of "Walking Stick" insects for use in cancer research. In recognition of their work Dr. Franks' representative Junior Red Cross have expended to Junior Red Cross members as "fellow research workers."

In connection with relief the Canadian over one half million dollars on relief for the child victims of war in China, India, Great Britain, Norway, France, Czechoslovakia, Poland, Yugoslavia and Greece. This work is to be continued during the coming year.

Junior Red Cross effort in Canada is one of constant expansion in work for crippled children and the new programme for providing entertainment for veterans in hospital. In the past the Juniors have made games, boards, bed-rests, drawing enclosures, and other items for the entertainment and comfort of hospitalized veterans.

Outstanding example of Junior Red Cross crippled children's work until this summer confined to paying

the expenses of handicapped children in Canada whose parents could not afford treatment, is the case of Ramprasad Jaggermuth, a boy of East Indian parentage living in Trinidad, who had a completely useless right leg, the aftermath of infantile paralysis when he was a year old. The Quebec division of the Junior Red Cross responded to a request from National Office to undertake to bring the boy from Trinidad to Montreal for treatment. Following a decision by the surgeon at the Royal Victoria Hospital, Montreal, not to amputate and after three operations there is hope that he will be able to return to Trinidad in a few months on his feet without crutches.

Because there is still great want among the child victims of war and the many crippled children in Canada; veterans in hospital who need entertainment, and, last but not least, the great obligation of the Junior Red Cross to work for good health for themselves and others, the Junior Red Cross is seeking to increase their membership to take care of the work in the present school year.

POULTRY STEALING

The stealing of poultry has been a regular business with certain individuals for many years and the more intensified the poultry are in any area, the greater is the likelihood of stealing being done on a large scale in spite of our regulations, police and all that we can do to prevent stealing we estimate that each year many thousands of chickens and turkeys are stolen on our prairie farms. This will be particularly true with the turkey marketing season approaching and the time of our heavy Christmas demand for poultry meats.

Very often poultry thieves work in pairs and visit the farm premises a day or several days before the actual theft takes place. The usual procedure is to drive right into the barnyard if possible. There one engages the farmer in conversation, usually trying to buy some poultry while the other busies himself looking over the premises in order to size up the possibilities.

Remember that regulations require that anyone buying your poultry must be in possession of a poultry buying license. Buying licenses are not issued to anyone who is not a licensed merchant. Therefore, these itinerant buyers cannot get a license and are buying illegally. If any person should call at your premises to buy poultry, ask to see his buying license, get his name from the side of the truck and the truck license number, and turn this information over to your nearest R.C.M.P. detachment or forward it to the Poultry Commissioner, Parliament Buildings, Edmonton. By all means do not let any strangers look over your farm premises, and if they call in pairs keep them together.

The Minister of Finance announces

A NEW BOND ISSUE FOR PEACETIME SAVINGS

Canadians are thrifty people. Their record in war financing will stand for many years to come.

Through six years, millions saved and invested in Victory Bonds and War Savings Certificates in a way no one thought possible. Many thousands learned the convenience of regular, systematic saving, whether in small monthly amounts or by larger cash investment. As a result they have accumulated substantial personal reserves with all that means in increased future security and satisfaction.

Because suggestions and requests have come to me from all parts of the country that facilities for this kind of saving be continued in peacetime, the Canada Savings Bond has been created.

The issue of War Savings Certificates and Stamps to the general public will be discontinued on September 30th, and final instalments on the last Victory Bond issue will have been completed in the near future. Canada Savings Bonds, therefore, will provide an opportune means for citizens to carry on their regular savings habits without interruption.

The general public should note that this time there will be fewer salesmen than in the case of Victory Bonds. Although the new Canada Savings Bonds will be sold through banks, authorized investment dealers, stock brokers and trust or loan companies, these agencies will not be able to approach every individual Canadian. This means that for the most part it will be left to Canadians to assume the responsibility for their own purchases of Canada Savings Bonds. If they wish to grasp this opportunity, they should act for themselves without delay.

Canada Savings Bonds are designed to be the finest investment available to the public today. I recommend them to you as a safe, profitable and convenient investment for personal savings.

I now announce the terms of the new Canada Savings Bonds, which will be offered commencing October 15th.

J. M. Macleay
MINISTER OF FINANCE

... Features of the new Canada Savings Bonds

Interest 2 1/4% by annual coupon. Purchase price 100%. Accrued interest will be charged if payment is made after November 15th. Issued in denominations of \$50, \$100, \$500, and \$1000.

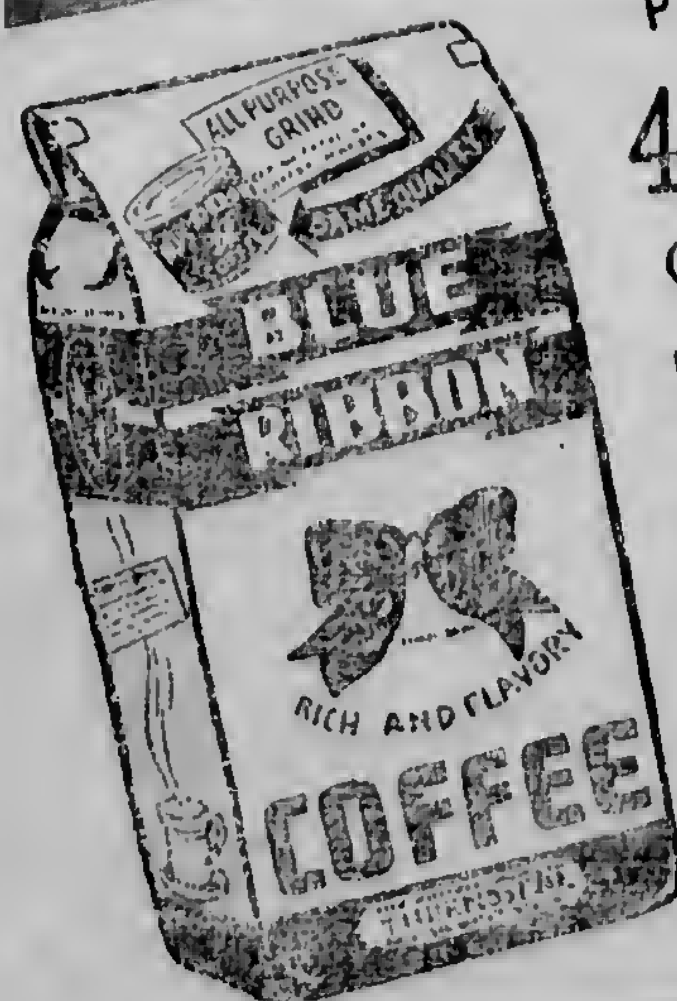

Dated November 1, 1946, maturing in ten years. Non-callable by the Government, but redeemable by the owner at any time at full face value plus interest at coupon rate of any branch in Canada of any chartered bank. Non-transferable and non-assignable.

Holdings by any one person limited to \$2000. Registered as to principal, providing protection against loss. Available for cash, on the Monthly Savings Plan or by personal arrangement with a bank.

BLUE RIBBON The Quality COFFEE

PRESENTS 4 BOOKLETS FOR CHILDREN

Printed in four colours and fully illustrated, these books are obtainable ONLY with Blue Ribbon Coupons. Send coupons to the value of three pounds for each book; found in Blue Ribbon Tea, Coffee, Baking Powder and Cocoa. Specify book wanted by number: 1, 2, 3 or 4.

POLISH VETERANS FOR FARM LABOUR

Some 1500 Polish Veterans arrive at the end of September to work on farms throughout Canada. This group will be the first of 4,000 Polish Veterans to be brought to Canada under arrangements made by the Dominion Department of Labour. The newcomers will be men with previous agricultural experience who have been carefully selected by a committee whose members are familiar with the type of worker required. Those men coming to Alberta will help chiefly with the sugar beet and vegetable crops of the south, and with the year round work of dairying and mixed farming.

The Polish Veterans will be brought to Canada on the understanding that they will work in agriculture for a period of two years. Failure to live up to this agreement may result in their being returned to the country of origin. A farmer who makes application for the services of a Polish Veteran will agree to employ him for at least one year at going wages, which must not be less than \$45. per month on the average for the year.

Farmers who require the services of these men are advised to obtain application forms and farm labour orders as early as possible. Forms can be had from National Employment Offices, District Agriculturists and local railway agents.

USEFUL EGG COOLER AND HUMIDIFIER

Experimental work has shown definitely that to maintain the quality of eggs they must be kept in an atmosphere that is both cool and moist—65 degrees Fahrenheit temperature and above 75 per cent humidity. A well ventilated cellar serves the purpose excellently, but where a cellar is not available the same results may be obtained by the use of an egg cabinet—an egg cooler and humidifier in one—such as has been evolved through the co-operative work of the poultry division and the Agricultural Engineering Section, Field Husbandry Division, Central Experimental Farm Ottawa. Full plans and specifications of the cabinet may be obtained by writing to the farm.

New Farm Implements

We hear from Australia that the Government has set up a three year agricultural machinery. Technical staffs for the testing and the development of new farm machinery have been organized.

This is a move worthy of further development on our prairies. There is now set up at the Dominion Experimental Farm at Swift Current an engineering branch that has to do with this very thing, of developing and testing new farm machinery. Similar good work has been going forward at the University of Saskatchewan under the direction of that most able farm machinery expert, Professor Hardy.

Hardly a month passes but that some farmer develops from his own actual practise some modification or some idea for better farm machinery, but who lacks the proper facilities for testing out his ideas. It is to be hoped, therefore, that the start made at the Dominion Experimental Farm at Swift Current and the good work being done at the University of Saskatchewan will be fully supported and encouraged.

Improved farm machinery will certainly play an important part in reducing the cost of production of wheat and other farm products.

(Searle Grain Company Ltd.)

No Sudden Ending Of Price Controls Contemplated

So Long as Menace of Inflation Remains Imminent

Some press reports have given the impression that the powers of the Board definitely will expire not later than March 31st next, and that price control will disappear on or before that date.

This is not correct. The emergency powers under which price control operates may be continued in force for a year beyond these reported deadlines if parliament regards such an extension as necessary. Moreover the Government has made it clear on several occasions that it does not intend to abandon price control so long as the menace of inflation threatens our national welfare.

What are the facts concerning the future of the emergency powers required to administer price control? To start with we have to go back to the close of last year when an Act of Parliament was passed, known as the National Emergency Transition Powers Act. This Act provided for the continued use of certain emergency powers on the part of the Dominion, including the powers required to administer price control, for a period of one year dating from January 1st, 1946. In case Parliament did not meet in November or December of 1946, it was further provided that the powers would continue until fifteen days after parliament first met in 1947. This was the legislation in force until the recent amendment which has led to unwarranted concern.

An Important Point Overlooked

That amendment simply states that in case Parliament does not meet in November or December of this year, the emergency powers will

Lethbridge Experimental Station

FALL IRRIGATION

At this time of the year we receive frequent inquiries as to the value of fall irrigation. Experiments conducted on the silt loam soils on the Station for a period of 12 years have almost as good results from fall irrigation on alfalfa, pasture grass and land that was to be seeded to grass or sugar beets.

Fall irrigation has two distinct advantages, it can be applied without interfering with the crop and it removes the necessity for irrigating early the next season when work is pressing. Also fall irrigation is an excellent way of storing water for next year's crop in the dry areas where occasionally there is a run-off from late September or October storms. There's the odd year when a snow at this period melts rapidly and gives some run-off. If this occurs water can be directed over the land and can be stored in the soil for next year's crop. These having irrigated until sixty days instead of fifteen days, after Parliament first meets in 1947 or until March 31, 1947 whichever date is the earlier. What has been overlooked in some press reports is that the amended Act, like the original Act, goes on to state that Parliament, if it sees fit, may before those powers have expired, extend them for a further period not exceeding one year.

The amendment has caused no fundamental change in regard to the question of continuing price distribution and rationing controls, though it has probably given Parliament more time to consider this very important matter. As before, the question is one which Parliament must decide. As before, the Government's price control policy remains clearly stated—to maintain essential controls so long as they are required to combat the acute danger of inflation.

ation reservoirs may wish to partially empty them should this fall run off occur. The water taken from the reservoir can be stored in soil by fall irrigation. It should be remembered that plants take out the water in the soil to a depth of 4 or 5 feet so that any water stored in soil to that depth can be used by the crops.

The one disadvantage of fall irrigation is that the soil may be more difficult to work in the spring should the season be wet. However, in our years of experience we have had so little trouble from this source that it has not been an important factor. The practice followed at the station and by many successful irrigation farmers is to fall irrigate all of the hay and pastures possible and if time permit to spread the water over other lands.

Bill Jones, who has operated the Raymond Bake Shop for the past 17 years, will be operated under the supervision of Paul Evans and Ted Abell, who took over on October 1st. Paul Evans is very well known in the community and served four years with the Air Force. Ted Abell is also a veteran of the R.C.A.F. and prior to joining he was employed at Palace Bakeries, Calgary.

S. M. SANFORD moves to Lethbridge.

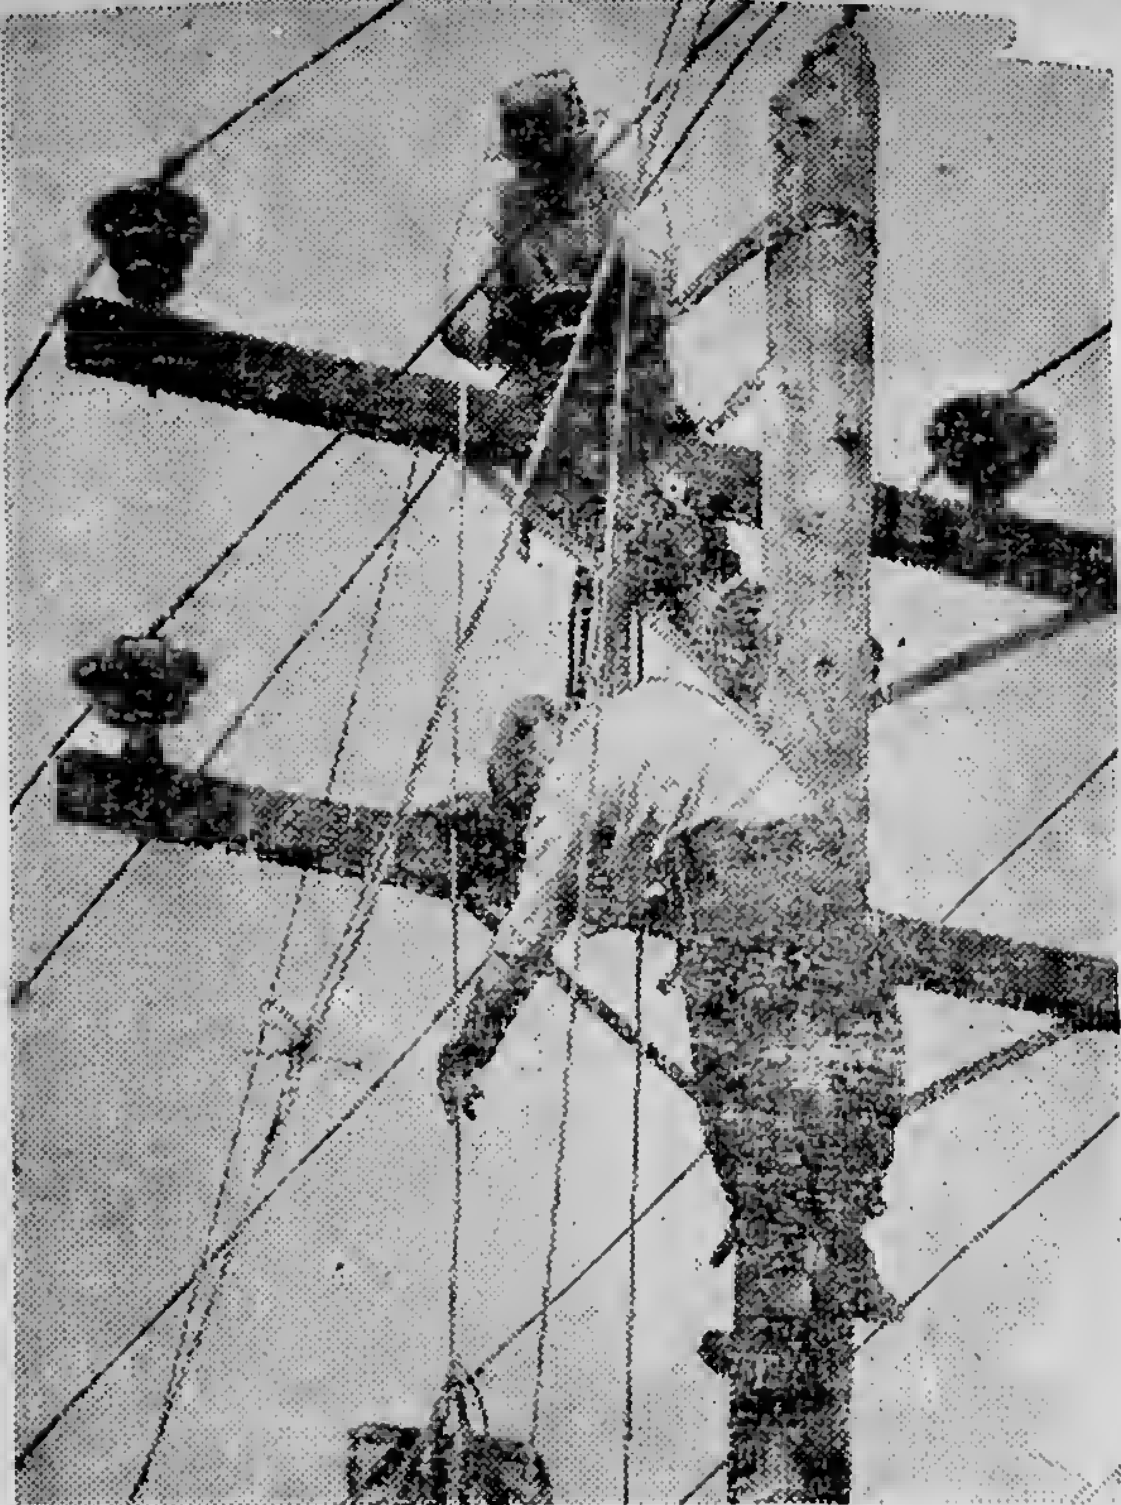

S.M. Sanford, who for the past four or five years has been the agent in Raymond for the United Grain Growers has resigned his position with the company. He has moved to Lethbridge where he will be associated with the Excelsior Life Insurance Company.

He spent fifteen years with the United Grain Growers. He will be replaced here by Bill Wilkinson who has been transferred from Cranston.

Come Wind... Come Weather...

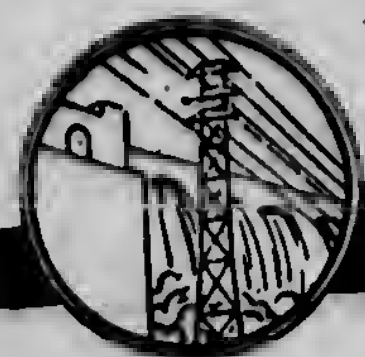

ELECTRICAL POWER IS DEPENDABLE

BEHIND the switch that brings you instant fingertip service lies the constant vigilance of many men. Through the dark hours of the night, when you and your neighbors sleep, their unceasing watch goes on. In summer cloudburst and wintry blizzard discomfort and oftentimes danger are their lot, but in the safeguarding of those slim wires traversing the countryside to your house and the house next door and the thousands of homes beyond that, lies their duty.

To them there is no such thing as service beyond the call of duty, for they know only the importance of uninterrupted electricity. They know that necessity is heedless of time and that emergencies may come at any hour. They know that when sickness strikes at night light is the first demand. Light that is gained at the flick of a fingertip with no thought that it might not be there.

That is your tribute of which they are so proud... you took it for granted. That is the way they want you to continue to feel, that ELECTRICAL POWER IS DEPENDABLE.

CALGARY POWER COMPANY LIMITED

SERVING ALBERTA

By DR. F. J. GREANEY, Director.

Line Elevators Farm Service, Winnipeg, Manitoba.

A Complete Seed Testing Service

For the benefit of prairie farmers, Line Elevators Farm Service maintains and operates one of the most modern cereal seed testing laboratories in Canada. It is well equipped and efficiently staffed. This year it will undertake to make a complete clinical examination of farmers' seed samples of wheat, oats, barley, rye and flax. This examination will include the following important tests.

1. Germination. High value will be attached to the ability of the seed to germinate and produce strong plants.

2. Weed Seeds. Samples will be examined for the presence of weed seeds, particularly seeds of noxious weeds.

3. Smuts. All samples of wheat, oats and barley will be tested for surface-borne smut. Seed treatment recommendations will be made.

4. Other Diseases. The presence of seedling blight and other seed-borne diseases will be reported.

5. Mechanical Injury. This test is particularly important for flax. Other samples will be examined for severe embryo and seed coat injury.

6. Purity of Variety. This is strictly a growing test and will be confined to wheat. Samples will be grown in the field next summer and analysed for varietal purity.

No effort will be spared to make these tests as reliable as possible. All methods of testing will be essentially similar to those developed and employed by the seed and plant pathological laboratories of the Dominion Government.

Farmers should submit samples for testing to their nearest Line Elevator agent as soon as possible, and inform him as to the tests required. Samples must be at least 4 ounces and not more than 6 ounces of cleaned seed, and should be truly representative of the seed lot from which they were taken. Line Elevator agents will provide suitable envelopes and forward the samples to Line Elevators Farm Service, Winnipeg.

WORLD HAPPENINGS BRIEFLY TOLD

Three thousand peak, one of the mountains along Labrador's rocky coast, has been named Mount Dalhousie after Dalhousie University in Halifax.

Hungarian titles will disappear under a new government decree abolishing titles and ranks as contrary to the spirit of the new democracy, it was learned.

Thirty-three pieces of Roman silver, made between A.D. 300 and 400 and all in excellent condition, were turned up by a plow in a field near Mildenhall, Eng.

Buckingham Palace has announced a new Private Secretary to Queen Elizabeth. He is 28-year-old Major Thomas Cockayne Harvey, of Ringstead, near King's Lynn, Norfolk.

The 2-power Paris conference will cost the French government some 200,000,000 francs (about \$2,000,000). It was disclosed in supplementary estimates submitted to the French Assembly.

After 100 years in the family of Rev. John Ouyryl the miniature of Lady Hamilton which Admiral Nelson wore at Trafalgar was sold by auction at Salisbury, England, for £200 (\$800).

A Skymaster plane broke the record for a civil flight across Australia from Perth to Melbourne by 16 minutes. It covered the 1,700 miles in six hours, one minute.

For the first time since 1939, the State Apartments of Windsor Castle, England, have been re-opened to the public. Visitors have again been afforded the opportunity to see the Round Tower.

Field Marshal Smuts

Never Accused Of Having Been Bought With Gold

If ever there was a man in this world who could never be accused of having been bought by British gold—they used to say that in the old days, when the British had gold—it is Field Marshal Jan Smuts, Prime Minister of South Africa. This superlatively educated and experienced old man, who certainly gave Kitchener a merry chase in the Boer War, has come out in the declaration that British imperialism, as such, the extension of the Empire, went out after the Boer war, the war in which he fought the British. Of course, enlightened Canadians have a good idea of all that but, unfortunately, to the South, they still think in different terms.

The evolution has been from colonies to Dominions. If it is still going on, as in the case of India today, the approach to self-government. Ireland has it right now in effect. We could have it, even to the extent of staying out of Britain's wars. Quebec wants it, but what is not realized in the neighboring province yet, and it may be in due course, is that while Quebec can stay out of a British war, it can't stay out of a United States war. That lesson was pretty close to home in the last few years and it is hoped that it will never be closer in the days to come.

However, Jan Smuts is a world statesman. He did not mention the name of Henry Wallace who derided British so-called imperialism. But he was near the mark. Prime Minister Smuts has known every move of the successive British governments for 40 years past. He ought to know, if any man does, what they have been driving at.—St. Catharines Standard.

Driver Of Car Should Not Let Anything Take His Attention

Victoria's chief of police says a cigarette can cause a bad automobile accident.

"If we are to reduce traffic accidents we must stop taking these little chances, which look so insignificant at the time we take them, but can have such tragic consequences," Chief McLellan says.

The chief is right, of course. An automobile driver lighting a cigarette while his car is travelling is taking a chance. He must turn his eyes from the road. In that one split second something disastrous can happen.

The driver of a car has a big responsibility, to himself, to those in his car, to those in every other car on the road.

Automobile driving is serious business. The person in charge of a car must be ever on the alert. Lighting a cigarette, fiddling with a radio dial, lecturing, rubber-necking at signboards and farm houses can have blood-stained results.—Time Magazine.

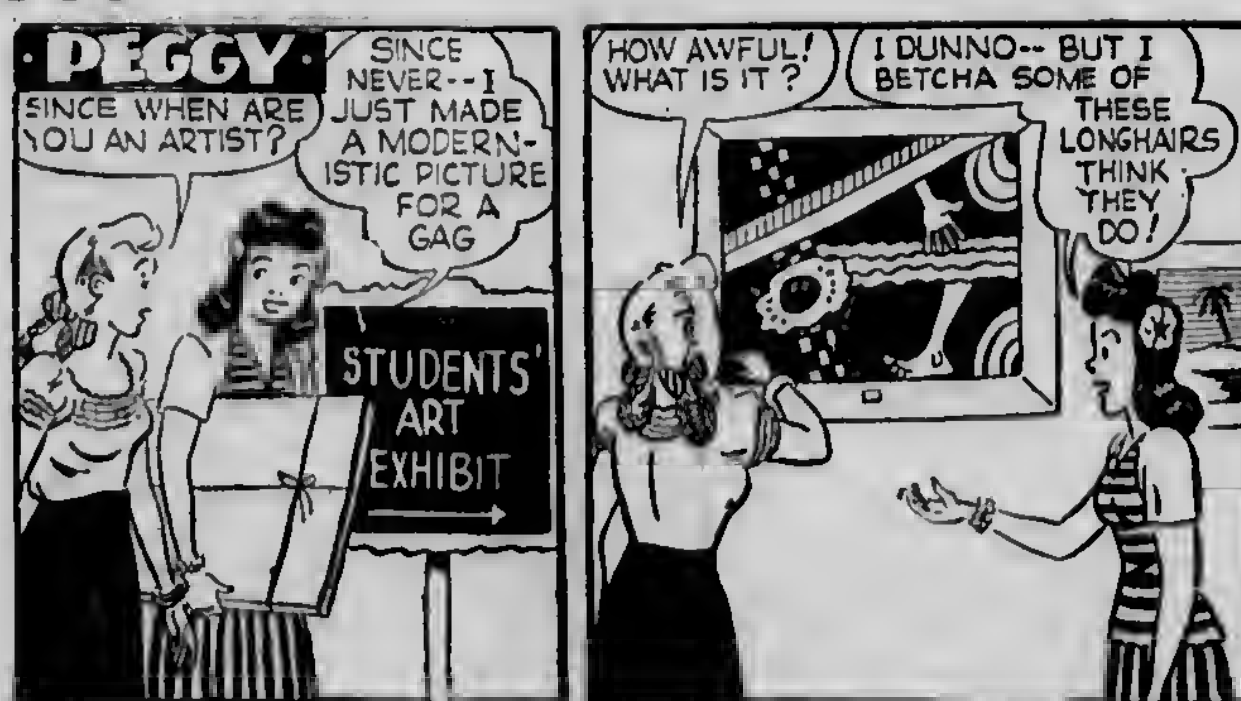

Regent's Park, London, contained 100 varieties of roses in its rose garden prior to the war. The garden contained 21,000 roses.

New Kind Of Rocket For Carrying Mail

British Air Ministry To Test Service

The London Daily Graphic said the British air ministry has obtained a site near Bedford for launching rockets to carry air mail to the United States.

If the experiments are successful Britain eventually will create radio-controlled mail and light freight rocket service travelling at the rate of 2,000 miles an hour. The rockets would reach the United States in 90 minutes.

THANKS TO HAMBURGERS

When the new organ is installed in the United Church at Yarker, 20 miles northwest of Kingston, Ont., the congregation will be able to say, "this is the organ that hamburgers built." A considerable portion of the cost was raised by the sale of hamburgers in the village each Saturday night conducted by church members.

day want protection and they so indicated in April of this year when more than 100,000 citizens of the Greater Vancouver Metropolitan Area were vaccinated because of danger of spread from the Seattle outbreak. "Very little urging was necessary. They just came."

Tremendous Power

Marine Engines Require Lots Of It To Do Hard Job

There is probably nothing so powerful in the realm of engineering as marine engines. If you have used a rowboat you will know how hard it is to pull against water, even when the boat draws only a few inches; more so against a breeze. Think, then, what a terrific power marine engines must have to thrust an 85,000-ton ship, carrying several thousands of people, plus baggage, stores and other paraphernalia, and with 30 feet or more below the waterline, at a speed of 45 miles an hour across the ocean in teeth of a strong wind.

No other leather can be dyed in as many diverse colors as kid skin.

THE PACIFIC OCEAN HAS AN AVERAGE DEPTH OF 14,000 FEET... ABOUT TWO AND THREE FOURTHS MILES.

U.S. SERVICE PLANES CARRY THE WHITE STAR AND BLUE DISK IN FOUR PLACES. WHAT ARE THEY?

SOMETIMES GO FIVE MILES AFTER FOOD, BUT THE USUAL MAXIMUM DISTANCE IS ABOUT A MILE.

ANSWER: upper surface left wing, under surface right wing, both sides of fuselage.

OUR COMPLETE SHORT STORY—

A GUN FOR JULIE

By THELMA GARDNER

Copyright
Wheeler Newspaper Syndicate

JULIE SERRIANI put the \$1,500 in a black cloth bag, pulled the drawstring very tight, and thrust it in the bosom of her dress. It made a bulge, but her winter coat helped to conceal the unusual outline.

Julie looked about the three-roomed cottage that had been her home for nearly twenty years. A childless widow has no use for a house on five acres of remote land but in the city she can always find some kind of work and \$1,500 is a fine sum for one's old age.

She put the padlock on the door for the last time, and with the precious bulge resting next her skin, slipped into the dusk.

Her brother, Daniel Concenia, was reading when she arrived at his cabin. He had both elbows on the table and his ears cupped in his hands. The lamp wick was turned high, and light flickered about the rough board walls of the kitchen.

"Hello, Dan," she said, taking off her hat and coat. "I've got the money. Old Man Turner paid me in bills, this afternoon." Her voice trembled with nervous excitement.

Dan's eyes moved quickly over her person. "Don't see no bag. Where you got it?"

"I've hidden it on myself. No one's going to snatch any purse full of money off me." She squeezed the neckline of her dress with nervous fingers, and felt the hard lump of bills.

"Will you walk to the train station with me, Dan? I feel sorta nervous carrying so much money."

Daniel folded the paper methodically. The lamp tottered on the rickety table. "I'll see what Uncle says. He's out in the work shed." He eased himself out of the chair, and made for the back door.

Julie sat down and waited. She fretted over the five miles she must walk to the train station. Five miles of dark country road. It was no joke for a lone woman with a lot of money.

Dan stepped back into the room. "Uncle was fingerin' on me helpin' him with a job. His car's on the blink an' I said I'd give him a hand with it. But I brought you this for perfection." He held out a shotgun. "It ain't likely no one will bother you, but sometimes these fellas get wind of loose dough hanging 'round the country."

Julie took the gun. "I never used one before. What do I do?" She fingered the cold steel at the barrel. "You don't have to do nothin'. If anyone bothers you and starts gettin' tough shove this thing into his stumstick, and let 'em have it."

"Oh no, Dan'l. That would be murder!"

"You want your dough, don't you? Well, you got a right to protect yourself. Awright, you feel O.K., eh?"

She looked at his concerned face, and smiled with a bravery she did not feel. "Sure I'll be all right. What will I do with the gun?"

"When you get about a quarter of a mile from the station toss it into the bushes on the right hand side, then I'll know where to look for it." Julie nodded and went to the door.

"And write me a letter when you get to the city, so's I'll know you arrived O.K.," Daniel called after her.

Do you suffer **MONTHLY FEMALE PAIN?**
This fine medicine is very effective to relieve pain, nervous distress and weak, cranky, "drugged out" feelings of such days—when due to female functional monthly disturbances. Also fine tonic!
LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Julie set off along the road for half a mile. She could see Rankin's light burning, a flickering square in the darkness. Not the friendliest of neighbors, but neighbors! She would call and bid goodbye.

Mrs. Rankin poured her a cup of tea and asked a lot of questions. Julie told them about the money and the gun. Bert Rankin looked suddenly interested. He moved off his chair with careless grace and picked up the shotgun. Although his back was to them, Julie knew he was examining the breech. She saw him go to a cupboard and reach inside. There was a metallic clicking, and then he stood the gun in a corner ready for her.

When he turned around and saw Julie watching, a strange look passed over his face. He took a chair, averted his eyes, and started rolling a cigarette.

Julie felt cold fingers of presentiment touch her shoulders!

"When she said goodbye, and moved off into the darkness, she carried the shotgun. Foolish, but at least it was protection. She'd never use it, even if someone did bother her, just frighten them off."

The night was ominous. Trees seemed to hang too far over the gravelled road, and she wished her feet wouldn't make that grinding sound. As she trudged along, every bush and every stump took on grotesque outline. Well, two more miles and she'd be at the station. The gun felt good in her hand. Soon now she could hide it in the bushes.

She wished the stumps would stay still. They seemed to be moving and jerking about in the darkness.

Another mile now. And that tall stump on the left, if only it wouldn't seem to move. Her imagination was playing tricks. No stump could move, but it was...

Julie stopped in her tracks. Her heart was pounding. A figure dislodged itself from behind the stump and advanced toward her, cautiously.

Julie moved two steps backward. The figure came on. Julie moved back again. She wanted to scream, but her voice was gone. The man was bent over, coming closer...

Julie felt her fingers tighten around the gun. She raised it waist high and waited! Ten feet! Eight feet! Six! Slowly, she squeezed the trigger...

The man seemed to stand still for just a second. Then he toppled over. Julie dropped the gun. She reached in her pocket for matches and struck one. The man was masked. Quickly, she ripped the cloth off his face. She knew then what had happened. Bert Rankin had loaded a gun that was intended to be empty. Julie started running for the train.

Anyone passing this way would come across the shotgun and the body... of Daniel Concenia!

SELECTED

RECIPES

BLACK AND WHITE CUP CAKES

- 3 tablespoons sugar
- 3 tablespoons water
- 1½ squares Baker's Unsweetened Chocolate
- ¼ teaspoon soda
- 2 cups sifted Swans Down Cake Flour
- 2 teaspoons Calumet Baking Powder
- ¼ teaspoon salt
- ¼ cup butter or other shortening
- ¼ cup sugar (*)
- 2 egg whites, unbeaten
- ¼ cup milk
- 1 teaspoon vanilla

Combine sugar, water, and chocolate in saucepan and cook over low flame until thick and smooth, stirring constantly. Stir in soda; cool slightly. Sift flour once, measure, add baking powder and salt, and sift together three times. Cream shortening, add sugar gradually, and cream together until light and fluffy. Add egg whites, one at a time, beating very thoroughly after each. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth. Add vanilla. Divide batter in two parts; to one part, add chocolate mixture, stirring until blended. Put by teaspoons into greased cup-cake pans, alternating light and dark mixtures. Bake in moderate oven (375 deg. F.) 20 minutes, or until done. Spread tops with frosting. Makes 16 large cup cakes.

(*) You may substitute corn syrup or honey for half of sugar. Use six tablespoons of each and decrease milk to ½ cup.

BRITAIN NEEDS WORKERS

Greatest obstacle to British industrial expansion is an acute over-all shortage of male and female labor, Sir Stafford Cripps, president of the board of trade, said. There was a shortage of 100,000 cotton workers and 57,000 wool workers compared with the pre-war period.

COST MANY LIVES

Chinese Traips And Civilians Were Massacred By Japanese

TOKYO—More than 150,000 Chinese were massacred by Japanese in Singapore, said a hitherto secret atrocity report read to the International War Crimes Court.

"They were punished or tortured to death by Japanese secret police," said the document—which the prosecution introduced as evidence over defense protests that its authorship was unknown.

The document was discovered last week by Col. Cyril Hew Dalrymple Wild of the British Army.

The Human Heart

Is Constructed To Last Nearly 100 Years, Says Specialist

Dr. Josiah Oldfield, a specialist at Chestnut, Herts, England, said the normal human heart is constructed to beat about 2,500,000,000 times—which would mean a life span of 95 or 100 years. But most people, he added in a speech, race the heart by eating meat, drinking alcohol or taking strenuous exercise, thus causing it to stop sooner. Dr. Oldfield, who takes it easy and lives mostly on fruit, is 83.

FOUND IN OSAKA

From the murky shadows of the Osaka arsenal, Japanese have produced the much-sought bronze statue of Queen Victoria, looted from Hong Kong by the Japanese Army. The crown and right arm were missing when the statue was turned over to Allied Headquarters, which had ordered it produced upon complaint from British authorities at Hong Kong.

For Outstanding Work

Two Awards For Drama Honors Come To West

Mrs. Elizabeth Haynes of Edmonton and Prof. E. Mindwyn Jones, Saskatoon, have received the Canadian drama award for outstanding work in promoting Canadian drama.

Mrs. Haynes, former director of fine arts, University of Alberta's extension department, has directed plays for the university, the Edmonton Little Theatre and the allied arts council.

She has acted professionally and is the author of several plays.

Prof. Jones directed plays at the several local productions. He now university and also was in charge of is with the University of Saskatchewan.

Make this 30-day test!

1. If you're really ill, see your doctor! But if you just feel dull and headachey, you may only be suffering from incomplete elimination. Especially if you're over 35. Here's how one simple change of diet can help you keep fit!

2. Start now to eat Kellogg's Bran Flakes every morning. If you want to keep feeling fit the natural way, get more of the "bulk" your system needs by eating delicious, gently-laxative Kellogg's Bran Flakes With Other Parts Of Wheat.

3. Just thirty days should prove to you how grand it is to feel alert, to have the energy for all the extra things you'd like to do. You'll want to go on keeping fit the Kellogg way!

Kellogg's Bran Flakes are delicious. In a recent survey Canadian housewives voted Kellogg's 3 to 1 favorite over any other brand.

Bran Flakes, Pep, Corn Flakes, All-Bran, Rice Krispies, Krumbles and All-Wheat are all made by Kellogg's, the greatest name in cereals.

Possibility Of Newfoundland Throwing In Lot With Canada

There is the possibility of Newfoundland becoming the tenth province of the Dominion. From a Canadian standpoint this is desirable. It would round out Confederation and Newfoundland is vital to our defence.

However, there has always been a strong feeling against Confederation in Newfoundland. They are suspicious of their big brother and they say the Maritimes are none too happy in Confederation.

It is unlikely that Newfoundland, and particularly now that they are prosperous and have a balance in the treasury, will consider joining with the Dominion. They will be welcome, but it is entirely a matter for the Newfoundlanders themselves. — London Free Press.

Restores Speech

So-Called Truth Serum Given To Man Who Had Lost His Voice

GOLDENDALE, Wash. — Mark Smith, 51-year-old Klickitat county farmer, credited sodium pentathol, the so-called truth serum, with restoring his voice, lost 28 years ago in a German artillery barrage in France.

Doctors confirmed that sodium pentathol was administered — first case in this knowledge of its use in restoring speech.
